Under a late hour the workmen were seen to be missing, and asking of their friends had yet been heard of, and always with the same melancholy answer.

THE BURNING OF THE PROPELLER "TINTO."—SEVENTEEN LIVES LOST.

On Thursday evening, 17th instant, the propeller "Tinto," from Montreal, bound to Lake Erie, passed Kingston harbor about half past eight o'clock, and when about three miles above the village, the engine stopped, and the fire had obtained the entire mastery of the building. The men attached their hose to the hydrant, and found that there was no water in them, so they moved the hose from one side to another, and continued to do so from that source, aided by a few cart-horses. Their efforts were utterly powerless, however, against such flames. The wind was blowing from the westward, and northward, and the flames were spreading rapidly, and the situation becoming more and more危急。
